

# Red Hat and Fedora Leftovers

By *Roy Schestowitz*

Created *31/01/2018 - 9:33pm*

Submitted by Roy Schestowitz on Wednesday 31st of January 2018 09:33:21 PM

- [A history of low-level Linux container runtimes](#) [1]

- [Red Hat Acquires Container Startup CoreOS for \\$250 Million](#) [2]

- [Red Hat buys CoreOS to jack up containerisation DNA](#) [3]

The enterprise focused open source platform company has bought CoreOS, a specialist technology player known for its Kubernetes and container-native solutions.

- [Elder Force Rolls Above Significant Line For Red Hat Inc \(RHT\)](#) [4]

- [Active Mover ? Red Hat Inc \(NYSE: RHT\)](#) [5]

- [Fedora Engineering meetings and devconf.cz](#) [6]

- [Fedora 27 Release Party photos](#) [7]

- [A heroic day. Or a few?](#) [8] [Ed: Company seems compromised with Microsoft executives in management and .NET pushers as staff]

...some more dotnet discussions, we got to see nice, relatively big fireworks for the 10th devconf anniversary. Another race to the office to change back to my usual evul clothes (out of the Fedora
