- [Opera 60 "Reborn" Browser Enters Beta with Crypto Wallet in Sidebar, Revamped UI](#)[1]

Opera Software announced today the general availability of the first beta release of their upcoming Opera 60 (a.k.a. Reborn 3) web browser for all supported platforms, including Windows, Linux, and macOS.

Opera 60 is the next major release of the Chromium-based web browser, featuring a refreshed user interface with light and dark themes that are inspired by high-key and low-key lighting photography, revamped tabs to make them stand out of the crowd, and more minimalist, yet fully functional design.

We've finished editing and uploading almost all the videos from the second room of the LibreOffice Conference 2018 in Tirana, Albania.

- [New service mesh emerges from the creators of gRPC and Istio](#) [3]

The creators of gRPC and Istio have created a new enterprise-grade service mesh that is launching today. Tetrade is built on top of Istio and Envoy, and adds enterprise-grade scalability, performance, and ecosystem adapters. Envoy is a network load balancer for microservices, while Istio is a service mesh that acts as a control plane layer over Istio.

- [Tetrade Launched, Google Chrome 73 Released, Godot 3.1 Is Now Available, Enroll to Try Android Q Beta, and Pi Day Live Stream Event and Contest](#) [4]

Tetrade, a new enterprise-grade service mesh from the creators of gRPC and Istio, launched yesterday. Varun Talwar, CEO of Tetrade and formerly co-creator of Istio at Google, says "Tetrade's mission is to create a secure and flexible application networking layer to help enterprises transition from their decades-old rigid networking stack. Our tools and technologies will help customers with availability and manageability of their applications as they undergo this transformation." In addition, "Tetrade is launching with \$12.5 million in funding from Dell Technologies Capital, as well as from participating investors 8VC, Intel Capital, Rain Capital, and Samsung NEXT." It also plans to use the funding to "extend its open-source leadership and further contribute to the open-source community". See this ITops Times article for more information.
