- [Purism?s Librem 5 Progress in Videos](#) [4]

Nothing shows the progress we have been making quite as clearly as a demonstration of the Librem 5 status from the devkit itself ? so let us take you through a handful of (short) videos showcasing the current possibilities and development of our Librem 5 devkit:

- [The Current State Of Librem 5's Linux Smartphone Functionality On Their Dev Kits](#) [5]

For those wondering how the Linux smartphone stack is shaping up for Purism's long-awaited Librem 5 smartphone that is currently aiming to ship in Q3, the company has released several video recordings of different operations running on their Librem 5 software on their developer kits.

Shown in this fresh round of video demos is a 10-second boot-up of the Librem 5 phone start-up on their developer kit, receiving a voice call on the developer kit, the SMS text messaging/chat application, web browsing and video playback, and a devkit to devkit phone

call.
