- [NumFOCUS Projects to Apply for Inaugural Google Season of Docs](#) [2]

We are happy to announce that several NumFOCUS projects are applying for the inaugural Google Season of Docs, a new program to foster collaboration between technical writers and open source projects sponsored by Google.

NumFOCUS is excited about this opportunity to welcome technical writers into our community and share the experience of what it is like contributing to an open source project. We hope the improved documentation resulting from participating in the program will make it easier for more people to start using our projects in their own research and work.
