- [Best Command Line HTTP Clients for Linux](#) [4]

HTTP clients are utility software that enables you to download files over the Internet. Apart from being able to download files remotely, these command line tools can be used for other tasks such as debugging and interacting with web servers.

- [A Quick Look at Elvish Shell](#) [5]

Everyone who comes to this site has some knowledge (no matter how slight) of the Bash shell that comes default of so many systems. There have been several attempts to create shells that solve some of the shortcomings of Bash that have appeared over the years. One such shell is Elvish, which we will look at today.

- [Fedora 29 : Commands and tools that handle assembly files - part 001.](#) [6]

- [How to install Opera Browser on Ubuntu 19.04](#) [7]

- [Integration blueprint example for mobile integration \(part 8\)](#) [8]

In Part 7 of this series, we looked at details that determine how your integration becomes the key to transforming your customer experience. It started with laying out the process of how I've approached the use case by researching successful customer portfolio solutions as the basis for a generic architectural blueprint. Let's continue looking at more specific examples of how these blueprints solve specific integration use cases.

This article walks you through an example integration scenario showing how expanding the previously discussed details provides blueprints for your own integration scenarios.

- [Humble Store has a big "Table-Flipping Tabletop Sale" going with some great Linux games on offer](#) [9]

Another week, another big sale. Humble are doing a Table-Flipping Tabletop Sale and there's actually a really good choice on Linux games.

- [In the survival game 'Vintage Story' you will now need you to protect your crops from sneaky Hares](#) [10]

Vintage Story, another promising cross-platform voxel survival game continues to impress with the latest updates adding in a fun new animal and some great sounding optimisations.

The recently released 1.9.7 update adds in Hares to the game and they're pretty quick on their feet. They come in 9 different variants based on the biome and they're hungry?very hungry. They will sniff out your crops, so you better protect your farms. They also get hunted by Foxes and Wolves, so it should make the environment a little more interesting if you suddenly see any of those dart across your screen on your travels.
