"It's Sunday afternoon somewhere in the world".

In fact, it's *_barely_* Sunday afternoon back home, where I'll be later today. But not quite yet, and I continue my slightly flaky release schedule due to my normal release time being spent on an airplane once again.

In fact, that will happen the *_next_* two weekends too due to yet more travel. So the releases will not be quite the clockwork they usually are.

But the good news is that we're getting to the later parts of the rc series, and things do seem to be calming down. I was hoping rc5 would end up smaller than rc4, and so it turned out. There's some pending stuff still, but it all looks quite small and nothing seems to be particularly scary-looking.

And this time around we don't even have any huge SPDX updates, so the diffstat looks nice and small and clean too. Normal changes all over (with drivers being the bulk of it as it should be: sound stands out, but there's gpu, HID, USB, block..). Outside of driver fixes there's the usual noise all ov
