Everybody knows that sysadmins are impossibly busy people. Consequently, it sometimes seems they are superhuman. The sysadmin's dirty secret, the same one shared by many open source users, is that they don't actually do all of the work it looks like they've done. One of the greatest tools in the sysadmin's kit is their ability to reuse work someone else has already done for them.

A good sysadmin knows where to turn when there's a big job to be done but nobody available to do it. If you're looking to work smarter, not harder, this is for you: a list of the top 10 resources every sysadmin should know about.
