- [MariaDB 10.4 + PHP 7.4 Slated For Fedora 32](#) [2]

This shouldn't come as much surprise, but the upcoming Fedora 32 will offer the latest "L.A.M.P." stack components.

The proposal has already been volleyed for including PHP 7.4 in Fedora 32. PHP 7.4 is due out in November as the latest annual update to PHP7. It's too late for Fedora 31 but the timing gives plenty of room to land PHP 7.4 in Fedora 32. Read about the new features and performance improvements with PHP 7.4.
