

# Audiocasts/Shows: FLOSS Weekly and Linux Headlines

By *Roy Schestowitz*

Created *13/11/2019 - 11:33pm*

Submitted by Roy Schestowitz on Wednesday 13th of November 2019 11:33:06 PM Filed under [Interviews](#) [1]

- [FLOSS Weekly 555: Emissions API](#) [2]

Emissions API is easy to access satellite-based emission data for everyone. The project strives to create an application interface that lowers the barrier to use the data for visualization and/or analysis.

- [2019-11-13 | Linux Headlines](#) [3]

It's time to update your kernel again as yet more Intel security issues come to light, good news for container management and self-hosted collaboration, and Brave is finally ready for production.
