A few days ago, I've released a GTK 3.98 tarball. This is another step towards GTK 4. It is a little bit behind schedule, and does not quite include all the things we wanted to get into it, but it gets a lot closer to what we want to ship in GTK 4.

Almost 9 months have passed since the 3.96 snapshot, so there are quite a few new things to look at. Too many to cover them all, but here are some highlights...
