- [GNU Linux Distributions ? about Fedora -> CentOS -> RedHat](#) [2]

The focus of the Governing Board is to assist and guide in the progress and development of the various SIGs, as well as to lead and promote CentOS.

The CentOS Governing Board is the governing body responsible for the overall oversight of the CentOS Project and SIGs, the creation of new SIGs, and the election (and re-election) of new board members. The Board also has the responsibility to ensure the goals, brands, and marks of the CentOS Project and community are protected. The Board serves as the final authority within the CentOS Project.

- [Stories from the amazing world of release-monitoring.org #9](#) [3]

I woke up to the cold morning in my tower. The sun shone brightly on the sky, but the stone of the tower was cold as it takes some time to make it warm. Everything was already prepared for today's journey. I sat at my table and started going through some reports from workers. I still had some time til the traveler arrived. So I started reading the reports ?
