- [Announcing Oracle Solaris 11.4 SRU18](#) [4]

Today we are releasing SRU 18 for Oracle Solaris 11.4. It is available via 'pkg update' from the support repository or by downloading the SRU from My Oracle Support Doc ID 2433412.1.

- [Oracle Ships Solaris 11.4 SRU18 - Finally Mitigates The SWAPGS Vulnerability](#) [5]

Oracle today has released Solaris 11.4 SRU18 as the newest version of the long-running Solaris 11.4 series.

There still doesn't appear to be anything active past Solaris 11.4 but Oracle does continue providing routine maintenance updates for Oracle Solaris customers. Solaris 11.4 has been out for a year and a half and is now to its eighteenth stable release update.

- [Linux And High Availability Go Hand In Hand](#) [6]

If SAP infrastructures or their components malfunction or stop working altogether, SAP-supported processes are also at risk. A comprehensive Linux package includes a High Availability functionality.

SAP core infrastructure components like servers (including VMs, storage, databases, and operating systems like Linux) or networks have a high level of technological maturity and take care of SAP-related tasks. It sometimes does happen that the IT department has to step in if business-critical applications like S/4 malfunction or stop working altogether because of faulty SAP infrastructure components.
