Submitted by arindam1989 on Friday 22nd of May 2020 06:08:23 PM Filed under [Software](#) [1]

Audacity recently released a major version 2.4.0. However, just after release, a critical bug is reported which caused the audio data corruption. The bug causes your audio to corrupt if you have two projects open and trying to copy-paste a snippet from one to another. The bug is fixed now with 2.4.1 release and you can install and use Audacity now.
