GIMP 2.10.28 is now released. This is a bugfix release, because we are giving most of our time and efforts to the development version (2.99.x).

Note: you may have noticed we skipped GIMP 2.10.26. A build bug has been discovered just after tagging the release. GIMP 2.10.28 is the same without the bug. We recommend against building and using GIMP 2.10.26.
