Submitted by srlinuxx on Saturday 12th of November 2005 04:33:27 AM Filed under [KDE](#) [1]

KDE 3.5 is [almost finished](#) [2], so we have prepared a [first release candidate](#) [3]. We want to have it tested as much as possible, so please give it a show. You can download the [sources from download.kde.org](#) [4]. To compile them you can use the [Konstruct build script](#) [5]. In the short time frame since tarball creation only [binary packages](#) [6] for SUSE Linux got finished, Kubuntu will upload theirs during the weekend. Thanks for your help in [reporting bugs](#) [7] and giving feedback so far.

On [dot.kde.org](#) [8].
