Submitted by Rianne Schestowitz on Sunday 12th of October 2014 05:03:05 AM Filed under [GNU](#) [1] [Linux](#) [2]

Like the phoenix rising from the ashes Lunar Linux is back with a vengeance; a lot of overhauling have been done all over the core tools, packages, installer and the ISO-builder. Even though our journey to reach this milestone have been a long one we hope that the changes and quality improvements we?ve made was worth the wait. So what are you waiting for? Go grab a copy of Lunar Linux while it is hot!
