A BRAZILIAN web designer got tired of having to boot Windows to see how web pages looked in IE, so he coded a little script allowing anyone to download, install and run IE on Linux.

Six years ago, if you dared to ask how to run IE on Linux, you'd get replies like this one, telling you 'petition Microsoft for one' -and wait until Hell freezes over, I'd add. Well, one realistic person named Sérgio Lopes, a 21 years old web designer and Linux user from Brazil, decided to make it easy for non-techies to install and run the Windows version of the Vole's web browser effortlessly.
